[OE. *þerscan* (pa. t. *þærse*, *þersconn*, pa. pple. *þorscen*), rarely and late *þrescan*, *þryscan*; a Common Teutonic verb, = OLG. **þerscan* (MLG., MDu., Flem. *dorschen*; also MDu., Du., LG. *dorschen*, LG. *droschen*, EFris. *dörsken*); OHG. *dreschan* (MHG., Ger. *dreschen*); ON. *þreskja*, weak vb. (Norw. *treskja*, Da. *tærske*, Sw. *tröska*); Goth. *þriskan* (**þrask*, **þruskans*).—OTeut. **þresk-* :—Indo-Eur. **tresk-*, exemplified also in Lith. *traszkéti* to rattle, make a noise, Russ. Трескать *treskat'* (refl.) to burst, crash, crackle: cf. OSlav. Трескъ sb. a crash. The metathesis *þersk-* for *þresk-* is found in OE., LG., Du., and Da. The meaning in OTeut. was prob. 'to tramp or stamp heavily with the feet', including both the action and the noise, as shown by the senses in which the word was taken into Romanic: Prov. *tresc-ar*, *dresc-ar*, It. *tresc-are*, OF. *trescher* to dance, Sp., Pg. *trisc-ar* to make a noise with the feet (see Diez s. v. *trescare*). The word came to be applied esp. to the act of treading out corn by the feet of men or oxen, and thus to the action of threshing by this or any later method. This is the only sense known in Gothic, OHG., and ONorse; but within historical times the chief mode of threshing was beating with the flail, whence the word came to be applied fig. to knocking, beating, or striking generally, and esp. of a person in battle or in punishment. In English this appears already in the OE. period; in German it is later (Grimm). The historical form in Eng. is *thresh*; a dialectal variant *thrash*, faintly represented in early times, came into literary use near the end of the 16th c., and became established in the 17th c., esp. in the sense 'to beat, flog, or belabour', for which it is now the ordinary form, while *thresh* is still largely retained in reference to corn. By this means, *to thresh* (corn) and *to thrash* (an offender or an opponent) have become to a considerable extent differentiated, so as almost to be felt as distinct words, esp. since the use of the flail has become so much superseded by mechanical means. Another form *throsh*, with the vowel of the pa. pple. as in Du. and LG., was frequent in late ME., but is now only dialectal.]

But, app. from the contiguity of the two forms *þrest*, and *þrist*, and possibly from the development in both vbs. of the notion of constraint or pressure, the OE. vb. appears to have been, by 1200, identified with the Norse vb., so that in ME. they were treated more or less as parallel forms of one and the same word, and actually appear in some cases as variant MS. readings. In ME., *thrust*, *thrist* was esp. northern and north midland, and *threst* predominantly southern, where it still survived in 1542. Jamieson takes it in the first quot. as 'throng, crowd' (which does not suit the context); the second and third examples he renders 'in haste, eagerly', the fourth 'in pairs, in couples'. In all the passages we have perhaps strained applications of THREAT *sb.* sense 2, 'pressure, etc.' introduced for the sake of rime.

†**Thri·vage.** *Obs. rare*—[1]. [f. Thrive *v.* + -age.] The quality or degree of thriving.

1610 W. Folkingham *Art of Survey* i. iii. 6 In Grouth, the thriuage, verdure, fruitage, prematurance, &c. of particular Vegetables are regardable.

**Thrive** (prəiv), *v.* Pa. t. **throve** (prōuv); pa. pple. **thriven** (priv'n). Also pa. t. and pple. **thrived** (prəivd). [ME. *þrīve*, first in Ormin (*þrifenn*), ad. ON. *þrifa-sk* refl., to thrive. So Sw. *trifvas*, Da. *trives* to thrive, flourish. No trace appears in English of the reflexive suffix, which must have been dropped before the word became naturalized. ON. *þrifa-sk* is in form the reflexive or passive of *þrifa*, recorded in the senses 'to clutch, grip, grasp, lay hold of with sudden effort'.

(For the sense-history Fritzner, Falk and Torp compare *taka-sk*, similarly used. The non-reflexive use may have started from the pa. pple *þrifenn*, thriven.)]

**Throe,** † **throw** (θrəʊ), *sb.* Forms: *α.* 3 (*ȝ*), *ȝ*-, 4-5 praue, prawe, thrawe, 4-6 thrau(e, (4 traue), 4-5 (*Sc.* 6-) thraw (þrɑ̄, þrā). *β.* 3-4 *throwe*, 4-7 throwe, (4 throghe), 6-8 throw. *γ.* 7- throe. [*Throe* is a late alteration (noted first in 1615) of the earlier *throwe*, *throw* (which survived as late as 1733). The origin and history of ME. *prowe* (found *c* 1200), and its northern form *prow(e*, *praw*, *thraw* (known *c* 1300, and still in use in Sc.) is not quite clear.

The normal source of an Eng. *þw*: Sc. *aw*, as in *blow* : *blaw*, *crow* : *craw*, *throw* : *thraw*, is an OE. *áw*; this would lead us to see in *prowe* : *prawe*, an early derivative from the verb *prowen* : *prawen*, OE. *þrówian*, THROW *v.*[1], in its early sense 'to twist, rack, torture' (cf. THROW *v.*[1], quots. *c* 1000). Some suggest that the ultimate source is OE. *þrawu*, 'painful infliction, affliction, plague, pang, evil' (BOSW.-Toller), which is perh. favoured by the instance *c* 1250 of *þrahes* rinning with *lahes* 'lakes' (if that belongs here). But *þrawu* would normally give in midland and southern Eng. not *throwe* but *thrawie* (cf. CLAW). On the other hand, a derivation (also suggested) from OE. *þrówian*, THROW *v.*[2] 'to suffer', which would suit Eng. *throw*, would not explain the northern *thraw*. If then the word was originally OE. *þrawu*, we should have to suppose that this by 1200 (under the influence of *þrówian* to suffer) became *þrówe*, but remained in the north as *þrawe*, *thraw*, and eventually ran together with *thraw*, THROW *sb.*[2], from *thrawn*, THROW *v.*[1]

The identity of *throe* with ME. *throwe*, makes its derivation from OE. *þrá*, ME. THRO, THRA *sb.* impossible. The change of *throwe* to *throe* was app. merely qua-phonetic; cf. *hoe*, *roe* (of fish) for earlier *howe*, *rowe*, also *bloe* as a 16th c. variant of *blow* sb., and on the other hand *slow-worm* for *slo-worm*, OE. *slá-wyrm*; *throe* would gain favour as making a distinction between this word and *throw* sb.[2] in its ordinary English use. In Scotland, on the other hand, where *thraw* vb. has kindred senses, *thraw* remains unchanged as the form of this sb., as in *deid-thraw* = death-throe.]

**Thro'mbase.** *Physiol. Chem.* [mod. f. Gr. θρόμβ-ος clot, THROMBUS + *-ase*, after *diastase.*] A synonym of thrombin (on the assumption that that is an enzyme).

1908 BAYLISS *Nature of Enzymes* 73 According to Morawitz there exists in circulating blood a body 'thrombogen', which can be converted by a 'thrombokinase' present in all tissues into a precursor of the enzyme which acts upon fibrinogen to form fibrin. This precursor, or prothrombase, is changed into the active thrombase by calcium ions.

But the late appearance of the word (*c* 1550), its app. synonymy with the earlier Throppele (*c* 1375), and the earlier existence of Throttle *v.*, combine to make its actual history perplexing.

Sense 3, of 17th c., is evidently a noun of action from the vb., and might be treated as a distinct word.]

The unstressed forms naturally prevailed in proclitic prepositional use, and the stressed in the adverb, and its derived adj. and sb. But with the restressing of the pref. *thrū* as *through* (θruː), this form has also become possible as an adverb, while on the other hand the stressed Thorough also survives as an archaic form of the preposition beside the normal *through*. *Thurf* is an early phonetic development of *þurh*, and *thruf* a more recent one of *þruh*, similar to (rʊf) for *rough*, *dwarf* from *dwergh*, (bɑːf) for *Bargh*, (brʊf) for *Burgh* (place-names), (enʊf) for *enough*, (þɒf) for *though*, etc. The metathesis of *þruh* for *þurh* occurs already *c* 1300 in a s. w. text; but otherwise in ME. is usually northern. From Caxton onwards it was the standard English form.

**Through,** obs. form of THROW, THROUGH.

**Through-,** in combination. (See THOROUGH-.)

**1.** Combinations of THROUGH *prep.* or *adv.* with verbs (pples., vbl. sbs.), or adjs. Chiefly *Obs.*

In OE. *through* qualifying a verb stood before it regularly in the infinitive and participles, and usually in the finite vb. in subordinate clauses. In such cases there was a tendency for it to be written in comb., as in mod. German *durchgehen*, *durchgehend*, *durchwachsen*. In some words this tendency became stronger in ME., and the combined form was used also in the finite verb. For these see the Main words below. The following illustrate the process, without any attempt to be exhaustive:

† **through-carve** (-kerf) *v.*, *trans.* to cut through; hence through-carved *ppl. a.*, see quot.; † **through-ca'st** *v.* [CAST *v.* 57], *trans.* to plaster throughout; † **through-cut** *v.*, *trans.* to cut through, perforate by cutting; † **through-drive** *v.*, *trans.* to drive a nail or spike through, to transfix; † **through-fyche** (**thurghe-fyche**) *v.* [FICCHE *v.*], *trans.* to pierce through, transfix; † **through-formed** *ppl. a.*, thoroughly formed, full-grown; † **through-ga'led** *pa. pple.* [GALL *v.*[1] 5], thoroughly harassed or disabled; † **through-handling**, management of details; carrying through; transaction; † **through-lanced** *pa. pple.*, pierced as with a lance, transfixed; † **through-look** *v.*, *trans.* to look through, examine thoroughly; † **through-nailed** *pa. pple.*, transfixed with nails; † **through-nim** *v.*, *trans.* to 'run through', transfix; *fig.* to penetrate; † **through-pierce** (**through-pierce**) *v.*, *trans.* to pierce through, transfix; hence *through-*, *through-piercing* ppl. adj.; † **through-ride** (**through-ride**) *v.*, (*a*) *trans.* to ride through, make a raid through (cf. RIDE *v.* 2); (*b*) *intr.* to penetrate through (cf. RIDE *v.* 9); † **through-rive** *v.* (*pa. t.* þurh-raf) [RIVE *v.*], *trans.* to rive or tear through; † **through-run** (**thurh-ernn**) *v.*, *trans.* to overrun; † **through-shed** (**þurjschede**) *v.* (L. *perfundere*), *trans.* to suffuse; † **through-shoo't** (*pa. t.* þurh-, **þorjschote**) *v.*, *trans.* to shoot through, pierce through; † **through-shove** *v.* (*pa. pple.* **þurghshove**), *trans.* to thrust through, transfix; † **through-swi'm** *v.*, *trans.* to swim through; † **through-thri'led** *pa. pple.*, pierced through; *fig.* thrilled through; † **through-wa'xen** *pa. pple.* [*waxen*, pa. pple. of WAX *v.*], grown over; † **through-wo'n** *v.* [OE. *þurh-wunian*: see WON *v.*], *intr.* to abide, continue, or remain through; † **through-wou'nd** *v.*, *trans.* to wound through or deeply. 1. Historically, A name of two British and general European birds; (1) primarily, and without qualification, that also called *Throstle* and *Mavis,* distinctively *Song-thrush* (*Turdus musicus*); (2) the *Mistletoe thrush, Mistle-,* or *Missel-thrush* (*T. viscivorus*), a larger and less musical species. Thence extended (with qualifications) by ornithologists to other species of the genus *Turdus* (many of which, in vernacular language, have other names, and are not regarded as thrushes), or more widely, to all members of the family *Turdidæ.* By colonists, travellers, etc., transferred, with qualifications, to birds of other lands, allied to the European thrushes, or merely resembling these in general appearance or some feature; see b.

The song-thrush is locally known as Throstle and Mavis, dialectally *thrushel, thrustle, thrusher, thrushfield, whistling thrush*; the missel-thrush, as *bull thrush, gaxthrush, holm-t., horse-t., marble-t., Norman t., stone-t., wood-t., thrush-cock, throstlecock, storm-cock,* etc. In OE. and ME., *thrush* and *throstle* are sometimes mentioned as distinct birds: see Throstle. Among the thrushes (*Turdi*) of ornithology, are the redwing, fieldfare, blackbird, ring-ouzel, of Great Britain, and the robin, very, hermit-thrush, wood-thrush, and other species of North America.

[*Note.* Norw. has *frosk*, *frosk* 'thrush', phonetically identical with *frosk* frog; cf. Norw. dial. *trausk* = *frausk*, 'frog', which seems to rest upon an old phonetic confusion of **þruskr* and **frosk*. Some would connect this with the fact that Gr. βάτραχος and L. *rāna*, *rānula*, 'frog', were also names of a disease in the mouth of cattle. The evidence of Eng. is however that **þrusc* = *ON. *þruskr*, was the orig. word for the disease in sense 1. The connexion of sense 2 is not explained; can it be connected with Da. *troske* rotten or decayed wood, 'rottenness in the bones'?]

Caesalpinus, 1583, has *thya* from Pliny and *thuia* after Gaza; he applies the name to the American *Arbor Vitæ, Thuya occidentalis*. [*Note.* Derivation from Tick *v.*[3], in sense 'to touch lightly', would, both in form and sense, suit the later use of *tickle*, but is not favoured by the chronology (since *tick* is not known so early as *tickle*), nor by the fact that the earliest recorded sense includes no notion of light touching or of the action of any external agent, but is merely expressive of bodily sensation. These considerations partly affect the theory of metathesis from *kittle*, inasmuch as the latter, exc. in the vbl. sb. *kitelung* (*a* 1200), *kiltlyng*, has not been found before 1440, and is from the first trans., = L. *titillare* to tickle (Sommone). But in ON., *kitla*, *kitlaðr*, *kitlandi*, etc., was an impersonal vb. of primary sensation: *mig kitlar* 'it kittles me', like *mig hungrar* 'it hungers me'. Traces of this appear also with 'tickle': see † it tickleth me' in sense 3. It was natural for an impers. vb. to develop both intrans. and trans. constructions: cf. the senses of Irk *v.*, and the modern *it grieves me* with *I grieve* and *you grieve me*. It seems possible that ONorse *kitla* was adopted at an early date in some parts of England as *kitl(al-ca*, *kittel*, and in others, under the influence of *tick*, as *tikl*, *tikel*, and that the

latter became the general Eng. form, while the more original *kitt, kittle*, was used farther north, and was thus later in literary record. Neither form appears in *Cursor Mundi*.]

[*Note.* The OE. word meant by J. is *tīdre*, *tydder* 'weak, fragile, easily broken; frail in health, infirm'; it could not give *tid* 'tender, soft, nice'. The latter does not appear as general Eng. before Bailey. But the *Eng. Dial. Dict.* has from Midl. counties *Tid*, *tidd* = 'fond, attached, careful (of), solicitous (about); (of a child) tender, nice, fanciful; (of a man) cunningly reserved'. J. D. Robertson's *Gloucester Glossary* (1890) has *Tid*, 'playful, frolicsome', and cites from John Smyth's Berkeley MSS. *c* 1640 (ed. 1885, III. 29) 'Tyd, i.e. wanton. For is very tyd, i.e. very wanton. A tyd bit, i.e. a speciall morsell reserved to eat at last'. These evidence the limited dial. use of an adj. *tid*, *tidd*, or *tyd*; though the senses given do not very closely agree with that deduced by Bailey from *tid-bit*.]

**II.** Tide of the sea.

[This sense corresponds exactly to MLG. *getide* neut., *tide lie*, neut. and fem., LG *tide*, MDu. *ghetide* neut., early mod.Du. *tijde*, Du. *tij* neut., 'tide of the sea', a particular application of MLG. *getide*, 'fixed time, time of prayer, proper time, opportunity, space of time'. OE. had no form corresp. to *getide*: taking for 'tide' (of the sea) *flód* or *flód and ebba*); and *tíd* or *tide* in this sense is not known before 1340; it may have been then introduced from or used after the MLG. word; but as ME. *tide* had neither the difference of form nor of gender seen in *de Flód* and *de tíd*, the actual formal evidence of the borrowing is wanting. There may have been a transference of sense in Eng. itself, as well as in LG. The following two early examples appear to mean 'the *time* of high water', rather than the flood tide itself, or the phenomenon of the tides:

1340 HAMPOLE *Pr. Conse.* 1215 For þe se, aftill þe tydes certayn, Ebbes and flowes, and falles sayn. *c* 1386 CHAUCER *Shiv. of Lawe's T.* 1036 Fro day to nyght it changeth as the tyde.]

**Tiding** (tai·diŋ); pl. **tidings** (tai·diŋz, *sb.* Forms: see sense 2 below. [Late OE. *tidung* f., early ME. *tiding*, as if f. OE. *tid-an* vb. to happen, befall + -ING 1; but prob. ad. ON. *tíðendi*, *-indi* neut. pl., 'events, occurrences, the reports of these, news, tidings', f. *tíðr* adj. happening, occurring + *-endi*, *-indi*, nominal suffix (see Vigfusson *Icel. Dict.* xxxiii/1); thence MSw. *tidhende* event, occurrence, news, Sw. *tidender* m. pl., Norw. and Da. *tidende* n. sing. tidings. In form, late OE. *tidung* (obl. cases **tidunge* (-*a*), pl. nom. -*a* (-*e*), gen. -*a*, dat. -*um*) might well be a deriv. of *tid-an*, TIDE *v.*1; but the fact that, beside it, early ME. had also *tiðende*, *-inde*, *tithend*, clearly from Norse, also *tiding-e*, with Norse stem and Eng. suffix, and *tidende*, *-inde*, with Eng. stem and Norse suffix, together with the fact that the word is unknown to OE. before the late 11th or early 12th c., and is recorded first in the transferred sense 'tidings', makes it probable that the whole group in Eng. was adopted from ON., in the north in the Norse form, in the south anglicized, in intervening districts with various mixtures of the two forms. It is noticeable that the English or fully anglicized form is that which happens to occur earliest in an extant writing, and also that which survives in mod.Eng., though the Norse type (with Eng. pl. *-s*) *tithand(e)s*, *tithans*, came down to 15th c. in north. Eng. and to 16–17th c. in Sc.

In ON. *tíðindi* is only plural; so Sw. *tidender*; in Norw. and Da. *tidende* is sing.; in early ME. *tiðende* was sing. or pl., with a tendency to make the sing. (*tidend*) the anglicized *tiding*, *-ing*, normally had the pl. **tidunge*, *tiding*; but, as in other fem. sbs., the *-e* of the oblique cases of the sing. was often taken by the nom. A single instance of pl. *tiðende* occurs in the later text of Layamon; but *tiðende* occurs in the later text of Layamon; but *tidinges* and *tithand(e)s.* The existing form *tidings* is usually construed as pl., but sometimes as sing.: cf. *news.* Ger. *zeitung*, MHG. *zîtunge* (1321 in Niederrheinisch) = MLG. *tidinge* (1468 in Bremen Dict.). Da. *tidding*, which agree in form with Eng. *tiding*, are of later appearance, and by some held to be due to Scandinavian influence (Kluge.)

**1.** Something that happens; an event, incident, occurrence. *Obs.* or *arch.*

(This is the etymologically earlier sense; though not exemplified in Eng. quite so early as sense 2, it was no doubt current in the Danelaw district from the first. In the two late quots. a literalism of translation.)

D. D.) Get Bridey Mooney till go an lift wi' them.

B. *conj.* (orig. the prep. governing the demonstrative pron. *that*, in apposition with the following clause.) Cf. Until, similarly used.

(From the earliest ME. times both *till that* (see *That conj.* 1 c) and the simple *till* occur; supplanting OE. *óþ þæt*, early ME. *oþat*, *a þat* (see *O prep.*[3], *A prep.*[3]), also OE. *óþ þe* and the simple *óþ*. *Till that* represented ON. *til þess* (MSw. *til þes* (*at*), *til þet*, Sw. *til dess at.*)

1. To the time that; up to (the point) when; until. (Denoting the continuance of the action or state expressed by the principal clause up to the time expressed by the dependent clause, and usually implying that at that time such action or state ceases and a different or opposite one begins.)

Formerly often (and still *arch.*) with dependent clause in subjunctive when expressing supposition, contingency, or expectation (in ME. sometimes even when expressing fact); so also in subordinate clauses below.

*a* 1154 *O. E. Chron.* (Laud MS.) an. 1137, þar he nam þe bisop..& ..hise neues & alle þæle in prisun til hi iafen up here castles. *c* 1200 Ormin 126 Swa þess leddenn heore lif' Till þatt tu wereenn alle. *Ibid.* 9310 Ne þatt tu nesst fulell Till þatt he waxenn wass. *a* 1225 *Leg. Martineau *Three Ages* iii. 89 To be left at the Blue Lion till called for. 1850 Tennyson *In Mem.* xiii. 8 Silence, till I be silent too.

b. With negative (expressed or implied) in the principal clause, and the dependent clause with *till* denoting the continuance of the negative condition up to the specified time, and usually (as in 1) implying its cessation or reversal (i. e. the commencement of the opposite or positive condition) at that time.

Here *before* can be substituted for *till*, but is not strictly synonymous with it, since in that case the negative qualifies the whole statement including the dependent clause. This may also be the case with *till*, e. g. 'You need not wait till I come back' (sense 1); cf. 'You must not go till I come back' (b). Hence some sentences of this form are ambiguous; but usually the context or circumstances make it clear which is meant.

A *weight* (Sc. *wecht*) is a vessel like a sieve without holes, formed by stretching a skin across a hoop of a few inches depth. In shape it resembles a tambourine, which may therefore be called, as Jamieson points out, a *timbre* or *timbrel weight*. *Wychtis* appears to be erroneous for *wechtis* or *weights*, and *waitis* to embody a false etymology.

[*Note.* As *tintare, tine-tare,* appears to occur nearly a century earlier than the simple form *tine,* it was possibly the original name, its first element being one of the other Tine words. If originally applied to *Vicia hirsuta,* the sense 'small or diminutive tare' (f. TINE *a.*) would be appropriate enough. But perhaps derivation from TINE *v.*[2], or TINE *sb.*[1] or [3], in reference to the injury or trouble which it causes, is more likely. Cf. the name *strangle-tare.*]

[*Note.* In the absence of evidence, the etymology of *tine,* its accidence, and its relation to TINY, have received a good deal of discussion: see Wedgwood *Dict. Eng. Etym.* (1872) 681, Skeat *Notes on Engl. Etymol.* 300, H. Wedekey in *Trans. Philol. Soc.* 1909. Prof. Skeat inclines to take *tine* as a later shortening of **tinê,* afterwards *tiny,* and **tinê* as a sb., possibly a. OF. *tinée* 'tubful'. But though it is possible that *tine* was orig. a sb., in sense 'bit', no evidence is that it was always used as such. Prof. Wedekey suggests the possibility of *tine, tinê, tiny* being aphetic for OF. *un tantin* or *tantinet* 'a little time or quantity', related to L. *tantilus* 'so small, so little'. This would suit the sense, but evidence connecting the forms has not been found (cf. TINY *a.*).]
